**Division of Water Rights** 

1001 I Street, 14th Floor • Sacramento, California 95814 • (916) 341-5300 Mailing Address: P.O. Box 2000 • Sacramento, California • 95812-2000 FAX (916) 341-5400 • Web Site Address: http://www.waterrights.ca.gov

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at http://www.swrcb.ca.gov.

OCT - 9 2002

Tod Leininger L&L Cattle Company P.O. Box 332 Vina, CA 96092 530-839-2509

Dear Mr. Leininger:

I have conducted a water rights search for the property outlined on the map that you provided. Your ranch extends onto four maps, the ACORN HOLLOW, RICHARDSON SPRINGS NW, ISHI CAVES, AND CAMPBELL MOUND 7.5' USGS quadrangles. The search indicated five filings in close proximity to your ranch, but all are situated outside of the indicated boundaries. The Division has no water rights on record for any location within the indicated property.

A reservoir of approximately 7-8 surface acres is shown on the RICHARDSON SPRINGS NW map as being located on your ranch within the SE¼ of SW¼ of Section 34, T24N, R1W, MDB&M. The Division has no record of a water right for this reservoir and its size indicates that an appropriate water right should be filed. In our conversation on 10-2-02, you indicated that there were numerous small stockponds on your ranch. These should all be filed for under the Division's registration for stockpond appropriation. I have enclosed the forms and Division publications for you to file for these water rights.

Please note that any diversion and use of water without a valid basis of water rights may constitute a trespass against the State of California and may be subject to monetary penalties, pursuant to California Water Code Sections 1052 and 1225.

If you have any questions, please contact the Division at the above phone number or address, or access our web site at: <a href="http://www.waterrights.ca.gov/">http://www.waterrights.ca.gov/</a>.

Sincerely,

ORIGINAL SIGNED BY.

William E. Soule Environmental Scientist III

# PLEASE COMPLETE, SUBMIT THE ORIGINAL AND MAKE A COPY FOR YOUR RECORDS \*\*\* E. <u>Changes ir Method of Diversion</u> - Describe any changes in your project since your previous statement was filed New pump, enlarged diversion dam, location of diversion, etc.) F. If part of the water listed in Part C consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below. I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief. SIGNATURE: PRINTED NAME: COMPANY NAME: GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA There are two principal types of surface water rights in California. They are riparian and appropriative rights. A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater. An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State. Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

future appropriators.

# GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please confact an attorney or write to this office. We have several pamphlets available. They include
